“ Jerry Tanzania

most memorable  
and life-altering yet  
budget-friendly Tanzania  
Safari Tours...”

To enjoy a Tanzania Safari Budget packages to the fullest we suggest you add the following in your itinerary: Go for the great wildebeest migration from Kenya's Masai Mara Game Reserve into the Serengeti National Park, from July to November. Explore Ngorongoro Crater – a once active volcano that now acts as home to a plentiful range of fauna and flora, as well as Africa's Big Five.

Stay at tented camps and avoid the lavish luxury stays to save cost on your budget safari. Moreover, it is recommended to plan your trip to the southern part of Tanzania as the park fees are more affordable and due to fewer crowds the stays are more affordable.

# CAMPING SAFARI TANZANIA

“ Set in the shade, these canvas sanctuaries recall safari's salad days—rustic, romantic, and refined.

Tanzania camping Safari lets you stay in large two-man dome canvas tents which are spacious enough for two adults and your luggage. Apart from this, you have the choice of selecting a single supplement if you are a solo traveler. If you wish to save on your Tanzania Safari Cost we recommend you choose camping safari Tanzania.

Our staff is at your service constantly, day in and day out, and helps you put up tents. You can put up tents all by yourself as well and even take it down. In case you are unsure how to do it, our Tour Leader will help in the same.

## TREKKING

*with* **JERRY TANZANIA TOURS**

The Lemosho Route is considered the most scenic route, on Kilimanjaro and is also one of the newest routes. The only difference it has from the Machame route is that it has, fewer people and has a different start. So both the groups join each other on day three and do the last couple of days together.

Lemosho Route also offers a great acclimatization profile, therefore has a very high success rate.

# LEMOSHO ROUTE

**DIFFICULTY**  
Medium

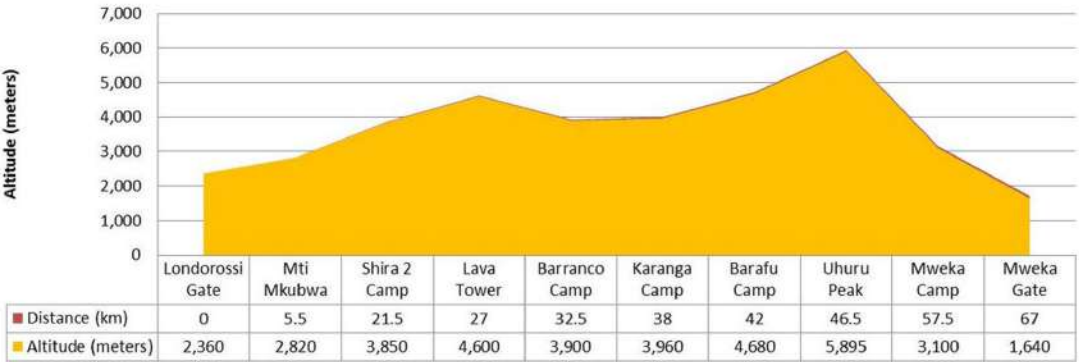

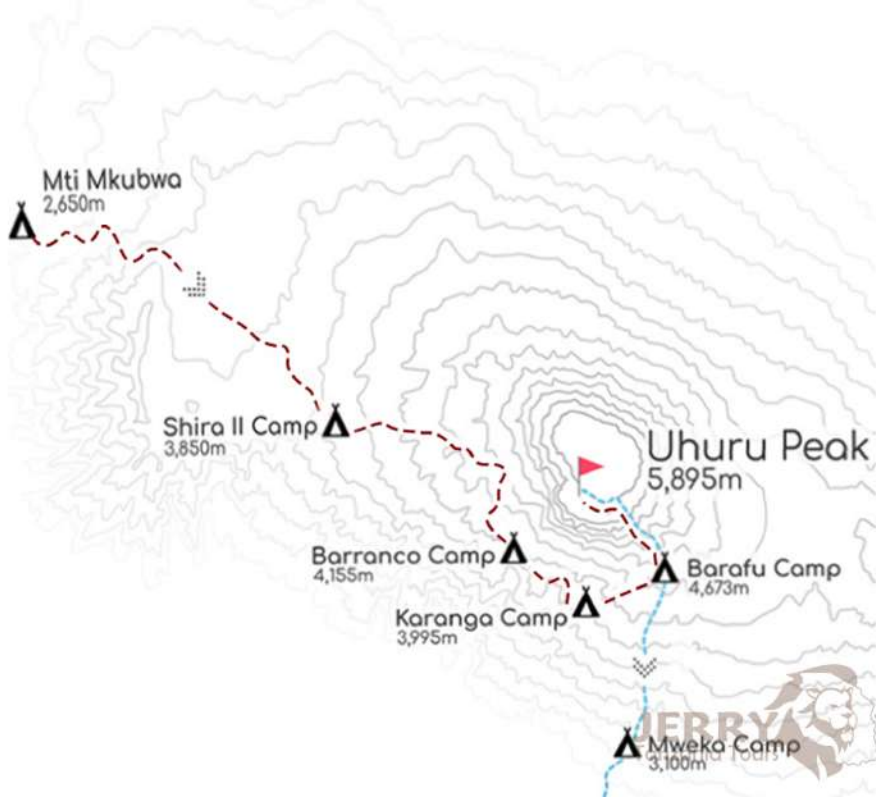

**DISTANCE**  
70 km

**DURATION**  
7-8 days

**SUCCESS RATE**  
High

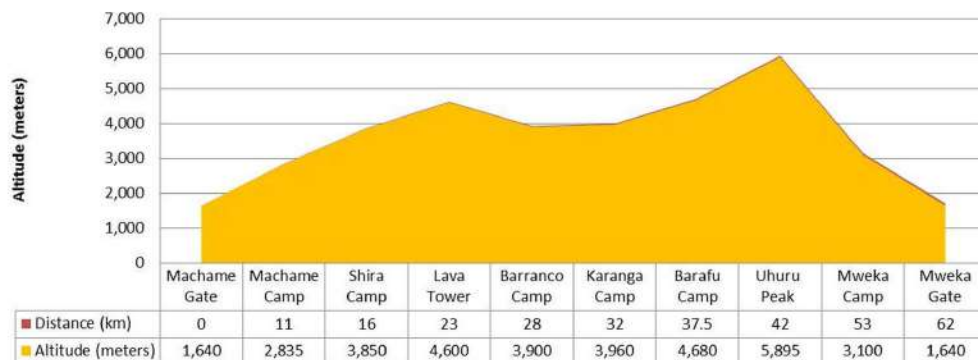

The Machame Route is one of the most scenic routes on the mountain and is also one of the western approaching routes. It's considered very beautiful, it has a great acclimatization profile, which leads to a high success rate.

It can be done in six days, mostly it's done in seven days. That's also what we would recommend. The only downside of the Machame Route is that it has become very popular, so it can get crowded than other route

## MACHAME ROUTE

**DIFFICULTY**  
Medium

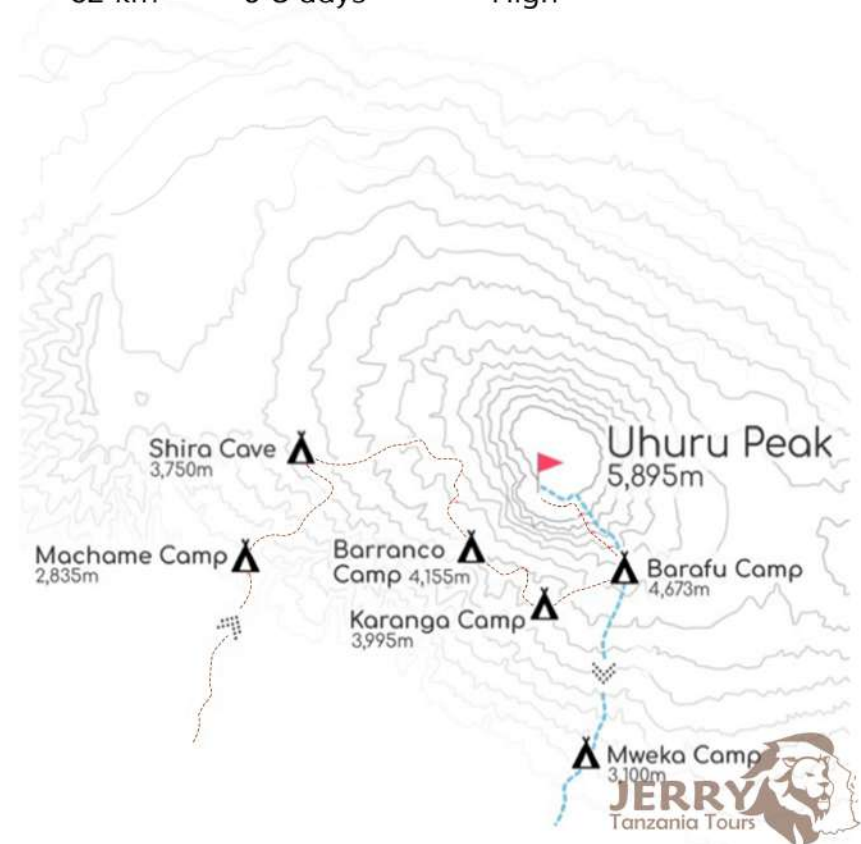

**DISTANCE**  
62 km

**DURATION**  
6-8 days

**SUCCESS RATE**  
High

The Marangu Route is the oldest and the most established route on Kilimanjaro. Sometimes referred to as the polar route or the tourist route as well, it's the only route that offers accommodation, and it can be climbed between five or six days. It's a popular choice if you climb during the wet season. Mainly because of the huts which offer, more protection from the rain than you would have when you camp on other routes.

Marangu route is not very scenic. So we wouldn't necessarily recommend it also because it goes up and down the same path.

## MARANGU ROUTE

**DIFFICULTY**

**DISTANCE**

## NORTHERN CIRCUIT

**DIFFICULTY**

**DISTANCE**  
98 km

**SUCCESS RATE**

Northern Circuit is also a western approaching route, but it's the only one that circles the mountain on the northern side than on the southern side. That makes it less crowded and also offers some beautiful views. The only side of the Northern Circuit is that you need nine days, but if you have the time and a little more budget, it is a very beautiful route.

This route also has a high success rate due to the length of nine days.

# RONGAI ROUTE

The Rongai Route is a medium difficulty route. It's a particularly good choice if you are climbing during the wet season. This is because it approaches the mountain from the North.

That means it receives less rain compared to the western route. It's not as scenic as the western routes. It doesn't have as much variety as compared to for instance Lemosho Route or Northern Circuit Route. But it still is a beautiful and popular route.

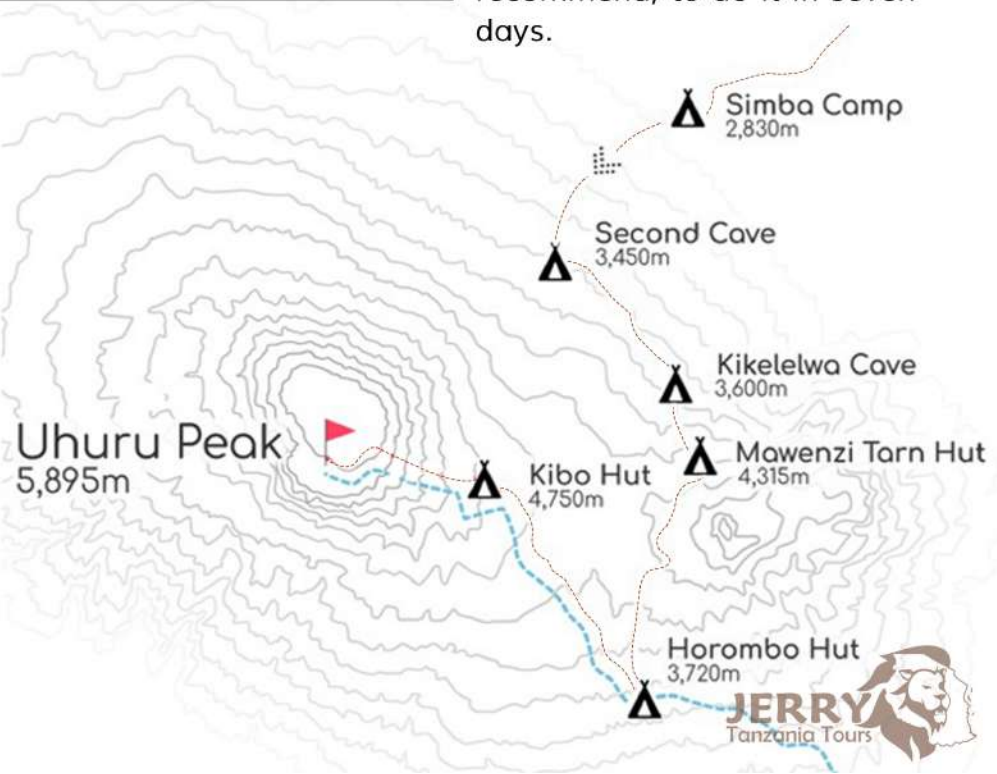

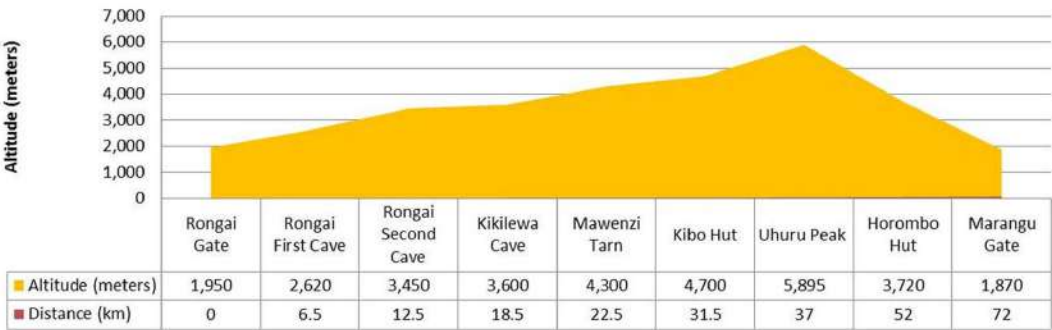

You can complete the Kilimanjaro Route climb in 6 days, but normally we would recommend, to do it in seven days.
